

# CUSTOMER NEWS LETTER

## RENEWAL OF SUPPORT AND UPGRADE AGREEMENT

### NEWS FOR 2010

The next Feature pack release in January 2010, will have a great new feature:

- **Powersim Studio 8 will be able to utilize multi-core computing in calculations to achieve faster simulations!\***
- **Tracing of dependencies between variables**
- **Improved viewing of multidimensional variables**

These are features available to customers with a valid Support and Upgrade Agreement. Feature Packs may be downloaded from our web pages.

\* The benefit of the multi-core computing will vary for the different product editions. More information on this will be available later.

### NEWS FROM 2009

During 2009, a new major release of Studio was launched, the Powersim Studio 8. This is a brief list of news:

- **Compatible with Windows 7**
- **Show Presentations with our Studio 8 Demo**
- **Collaboration in teams: Who-updated-what-variable**
- **Start-up Variables**
- **Series Variables**
- **Conditional Actions**
- **Transfer of 3-dimensional variables with XLS-function**

Business Intelligence  
**Analysis** **RISK** **SIMULATION**  
Optimization
